EDU license

We have introduced a new **6-month educational license option** in response to numerous requests from our users and academic partners. To make the process more convenient, students can now **generate their own licenses automatically** as soon as their educational institution's domain has been added to our system. This eliminates the need for manual verification and ensures that students can access the tools they need quickly and easily.

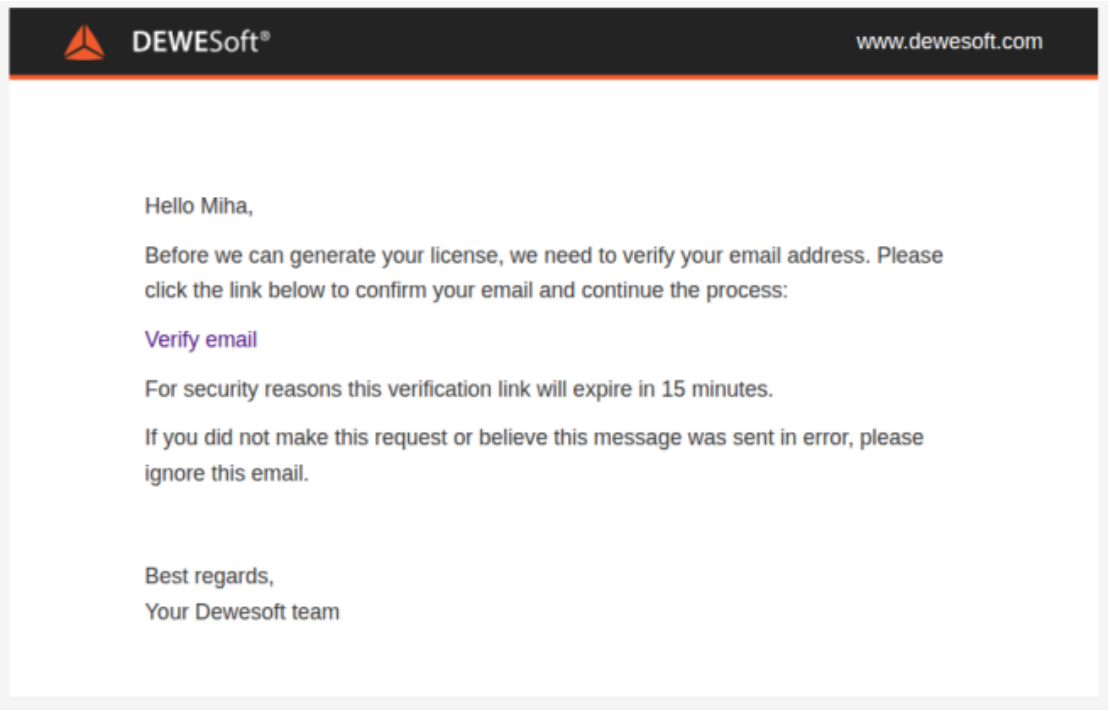

Go to our webpage and navigate to **licensing** (it can be found at the bottom of the page under the support section.

Fill the request the same way as for the evaluation license, but use the email address with the domain that is provided by the educational institution.

After you click on “Get EDU license”, you will receive a confirmation email.

Confirm your email address, and you will receive a follow-up email with the license key and registration guide.

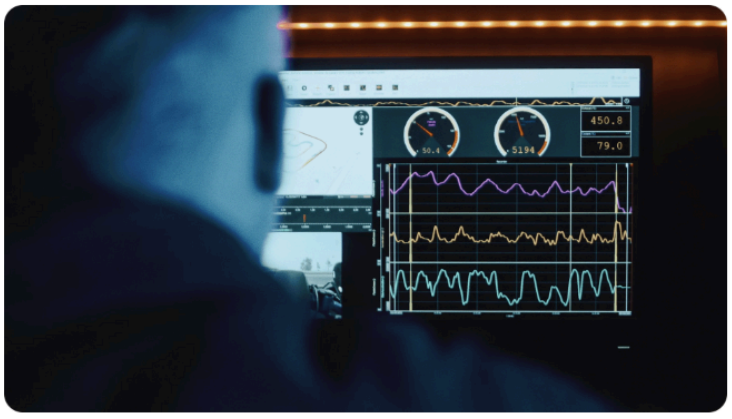

Your DewesoftX Education License is ready – start measuring today!
