

ALL-IN-ONE SOLUTION FOR REAL-TIME CONTROL AND FEEDBACK MONITORING.

V23-1

 **DEWESoft®**
7 YEAR WARRANTY

IOLITE® RACK

IOLITE®R12

19" rack version with up to twelve slots, dual EtherCAT® interface and redundant power supply.

IOLITE®R8

SIRIUS form chassis with up to eight slots, dual EtherCAT® interface and redundant power supply - also available in rugged chassis.

IOLITE® R8R

Rugged IP50 chassis variation with -10°C to 50 degrees Celsius operation range.

DUAL EtherCAT

IOLITE is equipped with two EtherCAT buses in parallel. The primary bus is used for full-speed buffered data acquisition to a PC computer hard drive. The secondary bus is mainly used for the real-time low-latency data feed to any 3rd party EtherCAT-based control system.

MULTIPLE CHASSIS OPTION

IOLITE R12 aluminum chassis is compatible with 19" rack cabinets. It can fit up to 12 I/O amplifier modules. IOLITE R8 and R8R are rugged aluminum compatible chassis for field-use and can fit up to 8 amplifier module cards.

Data acquisition and real-time control front-end system with dual EtherCAT buses for industrial testing applications.

HIGH-END SIGNAL CONDITIONING

IOLITE data acquisition systems feature high-quality analog and digital amplifiers that offer excellent signal quality. The amplifiers use 24-bit ADCs with up to 20 kS/s sampling rate, freely software selectable.

REDUNDANT POWER SUPPLY

IOLITE main frame chassis feature an integrated redundant power supply. This provides maximum system reliability for mission-critical applications.

MULTI-PURPOSE

With IOLITE you can measure voltage, current, strain, stress, vibration, sound, temperature, digital, counters, and more.

WIDE OPERATING TEMPERATURE RANGE

While IOLITE DAQ systems are labeled to run at -10°C ... 50°C, certain configurations can operate in the -40°C ... +85°C temperature range.

DEWESOFT QUALITY AND 7-YEAR WARRANTY

Enjoy our industry-leading 7-year warranty. Our data acquisition systems are made in Europe, utilizing only the highest build quality standards. We offer free and customer-focused technical support. Your investment into the Dewesoft solutions is protected for years ahead.

IOLITE®

Standalone, distributed, and cost-effective data acquisition devices for monitoring and industrial applications.

IOLITE®

High-end signal conditioning with a wide range of input and output channels.

DISTRIBUTABLE AND SCALABLE

A wide variety of amplifiers with different channel counts per module allows perfect channel distribution for monitoring, systems can be distributed with 100m distance between the modules and great signal quality due to short sensor cable length.

MULTI-PURPOSE

With IOLITE you can measure voltage, current, strain, stress, vibration, sound, temperature, digital, counters, and more.

HIGH-END SIGNAL CONDITIONING

IOLITE features high-quality analog and digital amplifiers that offer excellent signal conditioning and up to 50 kS/s sampling rate.

Distributed, and cost-effective data acquisition device with high-end signal conditioning for monitoring and industrial applications.

STANDARD INTERFACES

IOLITE devices are standard EtherCAT slave devices that are compatible with any EtherCAT master controller. When connected to DewesoftX DAQ software, retransmit functionality ensures no samples are lost during measurement.

PERFECT SYNCHRONIZATION

Units are perfectly synchronized and can use external timing sources like GPS for precise synchronization of dislocated units.
